## SUMMARY

Versatile Full-Stack Developer with expertise in end-to-end web development, adapting quickly to evolving requirements. Skilled in modern front-end and back-end technologies, optimizing performance and seamless integration. Passionate about learning new technologies and applying them to build scalable, user-centric solution**s** in dynamic environments.

## EXPERIENCE

### Full Stack Developer
**Vallaham**                                                                                    October 2024 – Present,  Coimbatore
- Led end-to-end development of web applications in a fast-paced startup, adapting to evolving project needs.
- Quickly learned and implemented new technologies and frameworks to optimize performance and scalability.
- Designed, developed, and deployed full-stack solutions, ensuring seamless integration across front-end and back-end.
- Proactively explored and applied emerging tech stacks to enhance project efficiency and innovation.

### Full Stack Software Developer Intern
**PSG Institute Of Management**                                      August 2022 – November 2022,  Coimbatore
- Collaborated with teams through daily meetings to gather requirements and align development goals.
- Developed and refined an alumni website, implementing features based on evolving needs.
- Proactively learned and adapted to new technologies, accelerating development efficiency.
- Contributed ideas and insights, enhancing project functionality and user experience.

## PROJECTS

### Lead Management System (Java Spring Boot & React)
Valllaham
- Developed a system to track and manage leads through different sales stages, allowing users to update and prioritize leads efficiently.
- Implemented a feature for managing proposals, where users can upload, view, and track proposals associated with leads.
- Integrated real-time notifications to keep users informed about updates on lead statuses and proposal activities.

### Decentralised social media
PSG CAS
- Website connects former students of the institute and serves as a platform for career resources, job opportunities, and
- staying up to date with current events at the institution.
- Have worked on both frontend and backend development for the website
- Created a UI/UX which is easy to use and navigate throughout the website.

### Alumni website
PSG IM
- Website connects former students of the institute and serves as a platform for career resources, job opportunities, and
- staying up to date with current events at the institution.
- Have worked on both frontend and backend development for the website
- Created a UI/UX which is easy to use and navigate throughout the website.

## EDUCATION

### Masters of Software systems
PSG College of arts and science · Coimbatore · 2024 · 81.1%

## CERTIFICATIONS

### Java Spring Framework 6 with Spring Boot 3 with Telusko
Udemy · 2025
- This course provided a solid foundation in Java, Spring Boot, and Microservices, enabling me to build secure, scalable applications. It also enhanced my skills in Spring Security, Docker, and backend development.

## SKILLS

Languages: Java, PHP, JavaScript, SQL

Frameworks/Libraries: Spring boot, ReactJs, Bootstrap

Data/Tools: MongoDB, MySQL, Firebase, Git, Visual studio
